SAFETY OF BUILDINGS ADJOINING TUNNELS &

Expressions of Opinion by Expert London Engineers.

Proper Care Will Avert Danger to Adjacent Houses.

Peril Can Be Avoided if Compressed Air is Used Against Inflows of Water.

Paris, Jan. 3.—The Herald's European edition publishes the following from its London correspondent:

London is as keenly interested in the subject of danger to buildings from tunnelling as Paris or New York, and more especially just now, as the question came in in connection with the structure n which the Bank of England is housed, excavations being made for the new Cant al London Railway through Throadneedle Street, on the side of the bank. It was rumored that the walls of the

bank and the other buildings in the neighborhood had been weakened through the removal of earth, and cracks had even been discovered in the bank building. The officers of the institution immediately called in Sir John Wolfe Barry, an emi-nent anthority, to make an examination and suggest a remedy. He said that the matter was not serious, but the fact/remmins that he is at work on plans for strengthening the bank building. Prof. George Aitchison, who is president of the Röyal Institute of British Archi-

tects, professor of architecture at the Boyal Academy, and one of the most emi-neut men of his profession in England, is very frank in stating his belief that there is distinct danger to buildings located in the vicinity of underground railways or tunnels. He says:

cis. He says:

numed of the earth where the soil is

E. W. Moir, of the same firm, who carriid through the Blackwell tunnet, and is engaged on the Hudson fliver tunnel,

stonged by means of working with compressed are against the fine where its material is flowing in: that is to say, the air pressure being a greater forter than write, the water had only comes to four, but will be driven look, and the sand would be as easily recreated as dry sugar, supposing, again, we had a satisfactor of the hands were our tunned, and that we found there was intertion of the brick liming. That could less be recipited by admining the iron, and the sampled grouning up the cross between the fining with a semi-fluid seament or lime.

That also should be not in under pressure, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system, but if a tunnel is driven on the shield system. That also should be not in under pressure, but if a tunnel is driven on the shield system with the shield alone would not prevent a settlement under remong sand, but the shield conducted "Here she is."

From across the Harlem flever a police-man had just brought in word that John Guttman, who lives at No. 1641 Forest Avenue, had lost a servant. She had left bis home the day before to go on an errand, and had not come back. Guttman, the police telephoned was no his way to ellevine the day before to go on an errand, and had not come back. Guttman tenched there at 5 o'clock, four hours after Riekard had begin to figure. At the slight of the man the girl was Lizzie Sandar; that she had been in the country only four weeks, and that she was a Hungarian, but spoke a pxullar accent. Guttman took the delighted girl home. Everybody congratulated Rickard.

"Anyhow, my figures came out all right," he said.

Mr. Thomas Meik, civil engineer agreed with Mr. Moir as to the causes of subsi-dences, and also that with due precaution there need never be any danger to houses

er buildings in the vicinity,
Even," he said, "if the tunnel were cut
through said of moist material there
should be no danger. Under the old system of building tunnels there was considerable risk of houses cracking or even fall ing in, but under the modern method o fron tubes, as in our Central London rail way, we can cut under any building with perfect safety. If anything goes wrong ; must surely be owing to some want of car

Defends Himself With an Ax. Richmond, Va., Jan. 2.—The faculty of Richmond College protochly evening had under investigation a hazing which took place at that historical during the Christman holidrys, but

which just leabed out.
The victim was Mr. C. N. Smith. He defended himself against the woold-be hazers so vigor only with an ax that the crowd was forced by

to use up their vital powers beyond all rea-son: It may be in housework; or social demands; or the bearing and rearing of children: At any rate the candle of life is

children: At any rate the candle of life is too rapidly consumed.

Some people need to have their natural vigor constantly reinforced in the same proportion that it is used up. They need the fortifying help of Dr. Pierce's Golden Medical Discovery. It is a powerful alterative and invigorant of the digestive functions and liver; it cleaness the blood, and makes fresh blood and healthy flesh. Nervous, debilitated women should take it in conjunction with Dr. Pierce's Favorite Prescription which is specially designed for female weakness and nervous troubles.

Mrs. Sallie Kanfinan, of Virgil City, Cedar Co.

female weakness and nervous troubles.

Mrs. Sallie Kaufman, of Virgil City, Cedar Co.
Mo, writes. "I had suffered from displacement
of internal organs and female weakness for one
year. Had a bearing down scusation and very
disagreeable feeling after my second child was
born: I could be on my feet only a few minutes
until he was six weeks old, then I commenced
taking Dr. Fierce's Golden Medical Discovery
and 'Favorite Prescription.' I took seven baties in all. After taking the first bottle I felt
much better. I think I am entirely cured of all
mytroubles. I can do all my work and am on my
feet all day. I am in much better health now
than I have been in four years, am fleshy and
gaining strength very fast.

By writing to Dr. Pierce who is chief

gaining strength very fast."

By writing to Dr. Pierce who is chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N.Y., careful professional advice will be obtained free of cost and specially adapted to the individual case. Dr. Pierce's great 1000-page Medical Adviser will be sent free for 21 cents, the cost of postage.

CLEVER DETECTIVE WORK

How Superintendent Rickard Found a Lost Girl's Home.

New York, Jan. 3.-M. J. Rickard, deputy superintendent of Bellevue Hospital, gave by from fractions to a point and over, o an illustration yesterday of how he thinks police cases should be investigated. Early in the afternoon a policeman walked into the institution with a pretty eighteenyear-old girl. He explained that she had

found. No orregonald understand a word. She was evidently lost, but how could the police find out anything about a girl w.o was virtually dumb to them? The policeman had taken the girl to the charities de-

man had taken the girl to the charities de-partment, but the department was closed for the holiday, so he took her to the hos-pital. There she was taken in, to be cared for until today.

It being a dull day with him, Rickard de-cided that he could find out something about his charge. He began with a bit of penell and paper, which he placed before the girl, making signs that she was to write. The girl samied took up the penell, bent over the paper, and in two minutes had with great care set down what looked like the figures [101].

had with great care set down what looked like the figures '1191.'

"Now," said frickard to some of the electes who watched him, "this is evident-by the number of a home or iestimation which had been impressed on the gell's mind. This icous simple. All I have to do is to find every avenue in the city which has the number '1401.' Then I'll tele-phone to the police station regress to the number to send a man around to the numnumber to send a man around to the num-Watch me find out where she

For an bour after that the telephone wires leading out of the hoseful were busy. In an hour and a half kicker-I had heard from all the 1401 numbers. No one

these the girl.

While the palice were at work Rickard american totton.

"You see." he explained, "this is uncertain; there are several ways of works.

Somewhat to the street are several ways of works.

of civil engineers. S. Pearson & Son. sho carried through, about fifteen years ago, the inner circle of the Loudon Metropolities and District Railway, tol. in the numbers 1-1-6-1. There was a respect to numbers all right, but she may have the numbers all right. Some large statement of the numbers all right, but she may have the numbers all right, but she may have the numbers all right. Some large statement in the property of the numbers all right. The right is not all right and the numbers all right. The right is not all right is not all right. The right is not all right is not all right. The right is not all right is not all right is not all right. The right is not all right is not all right is not all right. The right is not all right is not all right is not all right. The right is not all right. The right is not all right i

Now this number that she has written, if read from right to left, would be 1911, instead of 1491. I find that number in any first list of combinations. I'll try it. "Now," continued Rickard, "here's an-

There was a lot more telephoning after For that, and the police up town were in-structed to send men to house numbered he wildt." Rickard was still at his figures an hour later when the telephone man shouted. "Here she is."

La Grippe

Have you had it? If not, be prepared, for it is here. You needn't dread the disease so much as the suffering afterwards.

Why have it? 'Tis the weak, nervous, pale and below 45 during the morning hours. Why have it? 'Tis the thin who suffer most.

Scott's Emulsion

ing Federal Steel issues, American Stee and Wire issues, and Tennessee Coal and Iron. The railway list was generall strong. London houses were sellers in this market. There was no news to in fluence values, but traders laid som stress on the possibility of trouble be tween the American troops and the Fili-pinos. After the first half hour of trading sales to take profits were heavy and they caused some of the rallway stocks to recede front the best early figures. Ther was no weakness of tone, however, an many of the industrials continued to mak higher records.

Governments were unchanged.
At noon the market continued somewha irregular, a number in the list being down realizing sales. The undertone, however was firm, and trading continued active.

Somewhat to the disappointment of many room traders, the market was not strong during the opening hours this morning.

"This girl may have the numbers all right, but she may have arranged them tress done as compared with many of the brisk days in the last two weeks. The ex-planations were various, but it was evi-dent that there was selling by some of the It was the most dangerous and difficult piece of underground tunneling ever carried out, set underground in the city. Which shall I take?

Rickard paused, locked at the girl again and ran his finger down the column of figures.

The great requisites the founding are carried out of the second-long of a project amount of care.

The great requisites the founding are carried out of the second-long of a project and the every second of the second-long of the second-lo

and Brooklyn Rapid Transit, were the notable exceptions to the weakness of the my first list of combinations. I'll try it.

"Now," communed Rickard, "here's snother thing. This girl was found in West
Chester. I'll just try the stream far up
was bought well even on the advance. The professionals have been wrong on this stock always and apparently they will continue to be so, though undoubtedly if there is anything like a serious break in the market these securities may go off with a whoop in something the same way as American Steel and Wire did this morning. Brooklyn clung around 78 for the first hour persistently, some-what above the close on Friday, but it had no further advance during the mora-

The tremendous slump in Steel and Wire The tremendous slump in Steel and Wire was even more sensational than the very rapid advance during the last week of the year. The preferred stock went to 120 immediately and then, with no warming, dropped 15 points in a minute to 105. The advance began again then and much of the less was regarded. Such a wild fluethe loss was regained. Such a wild fluc-tuation as this shows, however, that when the slump begins in this market it will likely go with a tremendous suddenness. It is significant of the realization of this fact that the brokers are many of them raising the margin required on all deals.

Another of the Flower stocks, Chicago Gas, was one of the weakest on the list Gas, was one of the weakest on the list this morning, despite the bull tigs that were floating in the streets last Friday regarding it. There was a slump of more than a point in the first hour from the high figures on Friday. The street is mystified at this weakness, as Mr. Flower has been very bullish on this stock, as well as on the others of his favorites. It is thought likely however that the prois thought likely, however, that the pro-fessionals may be selling it in order to get in at the best figures for the advance when it comes. The stock pays six per cent and when other issues paying four are above that figure it seems certain that such a buil market must send its price up.

Big Four has had no movement for some time of consequence, but its friends are stanch, and their predictions most bullish. The position of the property is certainly most attractive.

CURRENT EVENTS

THE EXTENSION OF A RAILROAD

Destructive Fire in the Residence of Henry Copperthite-Accident to Mrs. Walker.

The Washington and Rockville Electric Railroad, a portion of which has already been built, and extends from Georgetown to Bethesda Park, is about to be extended from its present terminus at Betheeda through to Rockville. Several weeks ago the railroad company received permission from the commissioners of Montgomery County granting them the right to extend their line along what is known as the Old Dirt Road as far as its intersection with the Rockville and Georgetown turnpike. The commissioners have recently imposed contain conditions when the railroad contains conditions when the railroad contains conditions when the railroad contains and fleaters.

PENED

SOMEWHAT WEAK

Buying of these stocks, largely for investment, makes careful traders partial to them, on the theory that they will have as little reaction as any when the recession comes.

Sales—U. S. 4s, coupon, \$500 at 113 1-4; Columbia R. R. 5'c, \$1.00 at 108, \$500 at 116 Receiving and Georgetown turnpike as far as the corporate limits of Rockville. It is said that permission will be granted the railroad company in the reaction as any when the recession next week. The part of the road which is already in operation will be newly built. New cars will be purchased, and new and improved machinery will be installed in the power house. Engineers are at work now staking out the line of the road. This it is expected will take three or four days. The extension of the road through the Rockville and Georgetown business interests. through Georgetown.

Lest night at 8:55 o'clock fire was dis-covered in the rear rooms on the second floor of the home of Henry Copperthite, 1411 Thirty-second Street. An alarm was turned in from O'Donnell's drugstore, at the corner of Thirty-second and O Streets, to which Company 5 responded promptly. When the firemen arrived the flames were When the hiemen arrived the names were burning flercely and it was not until they had worked for nearly an hour that the fire was entirely subdued. The fire is sup-posed to have originated in the linen room, which is in the rear of the house on the second floor. A servant girl a short time before the fire, had gone into short time before the fire, had gone into the room to get some clothes and while there lighted a match. It is thought that the match ignited some paper which was lying on the floor and burned up after the giri had left the room. The damage will amount to \$500. The greater part of the damage was caused by water. There was a great deal of excitement occasioned by the ruinor which spread throughout the crowd that little Josie Chamberlain, a grandfaughter of Mr Couperthite, was in granddaughter of Mr. Copperthite, was in the burning building. The child was later found at the house of one of the neighbors. The loss was fully covered by insurance. Mrs. Edith Walker, living at No. 1500 Thirty-second street, fell on the pave-ment in front of the store of Anthony Hanion this morning about 8 o'clock, and dis-located her right arm. She was assisted to her home, which was a few doors away. Dr. Appleby was called, and rendered sur-

toal services.

IN GEORGETOWN OVERWORK MAKES WEAK KIDNEYS.

Unhealthy Kidneys Make Impure Blood.

YOUR KIDNEYS ARE YOUR BLOOD FILTERS.

A Prompt Way to Cure Yourself When Symptoms Show That Your Kidneys Are Out of Order.

To Test the Wonderful Merits of the Great Modern Discovery, Swamp Root, Every Times Reader May Have a Sample Bottle Sent Free By Mail.

The way to be well is to pay attention to your kidneys.

They are the most important organs of the body—the blood filters.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys strain or filter out the impurities in the blood—that is their work.

Purifying your blood is not a question of taking a laxative or physic.

Does your blood is not a question of taking a laxative or physic.

What the bowel cleaner does is to throw out the poisons confined in your bowels ready for absorption into your blood, but the poisons which are aircasty in your blood, causing you present sickness, it leaves there.

There is no other way of purifying your blood except by means of your kidneys.

That is why howel cleaners fail to do their work—they forget the kidneys.

When you are sick, then, no matter what you think the name of your disease is to your kidneys by using Dr. Kilmes's Swamp-Root the great Kilneys Remedy.

In taking Swamp-Root you afford natural help to nature for Swamp-Root is the order and gentle aid to the kidneys that is known to medical science.

EDUCATIONAL.

Itr. Kilmer, the cuninent physician and speciality, has attained a far-famed reputation through the disovery and marvelous station through the disovery and marvelous and dangeroes diseases, caused by sick kidneys.

Pain or duli ache in the hack or head, rehease, irregular heart, aleeplessness, all-lew ampleton, dropay, irriability, loss of ambition, obliged to pass water often during the day, and to get up many times at high, and all forms of kidney, had during the day, and to get up many times at light, and all forms of kidney had been day and the sold by all dealers, in fifty-cent or one-dollar battles.

To prove the wonderful merits of his great discovery, Swamp-Root is so the sample bottle.

The great discovery Swamp-Root is so remarkably successful that our readers are advised to write f
